President Baker speaking in the University Union Wednesday at a Campus Consultation Workshop designed to further student development.

President Baker:

## Students need input

BY JIM WITTY

Daily Staff Writer

President Warren Baker spoke of the responsibility of the university in student development at a Campus Consultation Workshop Wednesday. Characterizing Cal Poly as "a protective environment," he said, "We shouldn't be out of touch with the students." Baker said since Cal Poly is different from the real world, those with students must bring realism into the environment.

### class open to student enrollment

Because of the demand caused by Poly students, who need a course in order to get jobs such as lifeguarding at the San Luis Obispo County of the Red Cross will offer another course in cardiopulmonary resuscitation. The course will be offered on May 19 and May 21 from 6 to 8 p.m. at Sierra Vista Hospital. There is a \$4 fee for text and materials. Those interested in the course can call the San Luis Obispo Red Cross at (805) 781-1111.

This will be the last course of this year, according to a spokeswoman. As of this morning, she said, the class is already half full.

### Lettt to be in Prop. 9 debate

Minority Leader Lettt (R-Atascadero) and Vincent, representing California, will be in the Proposition 9 in a free debate at Cal Poly. The debate will start at 10:45 a.m. in the Mash Auditorium. Despite the philippics, her home county by Proposition 9 author Howard still supports the

Baker also touched on the problems of campus minorities.

"We must be particularly sensitive to the special problems of minority students," he said, adding that the problem of white students relating with minorities would also be a significant problem in the next decade.

Baker concluded by saying, "Total development of the student should go hand in hand with academic development."

The workshop, held in UU 220, also featured Dean of Student Affairs Russell Brown and Joan Cirone of Student Health Services who both addressed the group of faculty, staff and administrators.

Dean Brown explained that students' educational environment must stimulate their growth. He outlined a four-pronged attack to better prepare students for life outside the university:

- Focus on student successes and failures.

- Anticipate student needs and act accordingly.

- Push students to work because a certain level of anxiety is necessary, although he said too much stress could be detrimental.

- Maintain skilled administrators, faculty and staff, all essential to student development.

College-age students are ready to experience new things, Brown said, because encountering new

and challenging values can stimulate growth.

Joan Cirone of the Student Health Services spoke about developmental issues of the college student.

Cirone explained college students occasionally have problems dealing with student life. She emphasized that professors should be aware of students as individuals.

Dr. Lois Dirkes, coordinator of the workshop, explained the main thrust of the seminar was to promote the idea of students as people as well as simply pupils.

Cirone summed up the tone of the workshop by saying, "My heart goes out to the students. They have a tough life."

## Mustang editor appointed for 1980-81

A Cal Poly senior majoring in journalism has been appointed by the Publishers of Mustang Daily as editor for the 1980-81 school year.

The Publishers, which consists of journalism professors and the current Mustang Daily co-editors, chose Andrew Jowers to become the newspaper's incoming editor.

Asked how he felt when notified of the appointment, Jowers said that he felt just like anyone else who has been appointed Mustang editor.

"I'm really looking forward to it," Jowers said.

Jowers was appointed co-editor of the 1980 Poly Royal edition of the Mustang Daily, and it is there that he said he got a taste of what being editor was like.

"I learned how much fun it could be," said Jowers, who wrote an interview with Howard Jarvis in the Poly Royal edition. "I got a lot of satisfaction out of doing it. I always had it in the

## Schools sought for 2 departments

BY KAREN GRAVES

Daily Staff Writer

The political science and social science departments will be moved fall quarter, but their new homes have not been determined.

The Division of Social Sciences, in which these departments are located, will be disbanded as of September 1, said Hazel Jones, vice president of academic affairs.

Jones said the Division of Social Science has served as a temporary home for these two departments since they were separated from the School of Business about four years ago for accreditation purposes.

The change will be of an administrative nature and will not affect the curriculums in these departments, said the vice president. Jones will make a recommendation as to what schools the departments should join, but the final decision will be made by President Warren Baker.

No jobs will be lost in this transfer of departments, said Jones. Warren DeLey, the associate dean of the division of social sciences, will return to a full time teaching position in the social sciences department. The division's secretary will be transferred to the academic affairs division to become secretary to the dean of academic planning, said Jones.

DeLey will not receive a cut in pay as a result of this move, he said. Instead, he will be placed on an academic year contract instead of the current twelve month contract he is under as associate dean.

Jones has not yet decided whether the departments will move together or apart. The social science department is exploring a move into the School of Human Development and Education while the political science department is interested in moving into the School of

Communicative Arts and Humanities, said Jones.

But the political science department wants to "have the name of the school reflect the fact they are there," said Jones.

Earl Huff, political science department head, said, "The political science department wants the social sciences to be united in one school." He added the department wants "a permanent solution to the problem rather than just drifting from school to school."

The social sciences department is interested in moving into the School of Human Development and Education because many students in the department are involved in student teaching programs. Another reason is because most of the professors in the department are sociologists and they are interested in joining the school because it contains both the psychology and child development departments.

If either of these departments joins the School of Communicative Arts and Humanities, the name of the school would be changed, possibly to the School of Social Sciences and Humanities, said Jones.

Groupings of humanities and social sciences are common throughout the California State University and Colleges system, said Jones.

"Changes in the School of Human Development and Education might mean that there is a logical home for the social sciences elsewhere," she said.

If both departments do move into the School of Communicative Arts and Humanities it would make the school the second largest on campus in terms of faculty, said Jones. This is because the school does a great deal of support work essential to general education programs.

See Realign, page 4

back of my mind (becoming editor), but that really clinched it."

Jowers has two quarters of experience of working as a Mustang Daily staff editorial assistant—getting experience in newspaper layout, copyediting

and headline writing—and two quarters as a staff writer.

Jowers thinks the experience of being Mustang Daily editor will be a rewarding one.

"When am I going to be able to be editor of a newspaper again?" he said.

## Letters

### Remarkable insight

Editors:

Over the past few days I have been paying particular attention to a number of articles pertaining to that highly esteemed tax crusader Howard Jarvis. I am deeply troubled when I see a man of such prominent wisdom being treated so unjustly by the press. It's incredible that a man who speaks with such eloquence, insight and clarity should be asked to apologize for his remarks.

First of all I would like to point out Mr. Jarvis' reference to San Luis Obispo County as a "lousy county." I have also noticed, only after careful observation, a particular abundance of lice in this county. It took a great deal of courage to speak up about this public menace.

The second remark is one which exhibits such a profound choice of words that it cannot be disregarded. "There wasn't a son of a bitch in the City of San Luis Obispo that knew." According to Socrates, the dog is the only true philosopher. It's shocking to think that of all the male philosophers in the city, not one can claim to have that precious thing called knowledge. Hopefully, the bitches do not suffer from the same plight as their sons. Mr. Jarvis certainly has an exceptional understanding of Plato's Dialogues.

Finally, I would like to refer to Mr. Jarvis' remark concerning the professors and their students. "They give you a bunch of garbage." I have had classes here at Cal Poly in which professors actually brought garbage cans from their homes to distribute the contents to their students. What a disgusting waste of time.

From the utterances I have cited it cannot be denied that Mr. Jarvis is

indeed a great thinker to be compared only with such heroes as Attila the Hun or Idi Amin.

Steven H. Mackey

P.S. Certainly an education can be obtained by working one's way through college but apparently it didn't benefit Mr. Jarvis' manners or ability to express himself.

### No guarantee

Editors:

I conclude from Mr. Figone's letter (*Daily*, May 13) that being from one of the county's old families does not guarantee that an individual won't be an ignorant, venomous bigot.

C. Hall

### To ASI Senate

Editors:

Let me say this about that. The victory of the Equal Registration Initiative (a resounding 3 to 1 margin) in last week's election has a far more significant meaning than the mere correction of a lingering injustice here on campus. It is a clarion message to the ASI student senate and the elected office holders that a repeated disregard for a predominate student-body demand will not be tolerated.

Take heed! The dismally ineffective tinkering with issues that echoes in the senate meeting room every week can easily be replaced by the initiative process if necessary.

We are grateful to all those who helped with this campaign and our special thanks to an aware and angry student electorate.

Stephen E. Jensen  
Campus Libertarians

## To appreciate Mexico

Last Monday was Cinco de Mayo. That makes this as good a time as any to consider our sorry relations with Mexico.

Any nation that borders ours deserves better-than-average treatment. Many people don't realize, or take for granted, the free ride we can get because we don't have to worry about our neighbors. The Cuban missile crisis is an example of how a problem is aggravated when it's close to home.

The Russians, who know the value of proximity, have grabbed Cuba and tried to grab Mexico. In 1971, Mexican guerrillas, financed by Russia and trained in North Korea, tried to spark a civil war: John Barron, in his book *KGB*, recounts how close the guerrillas came to realizing their plans.

There's no reason to expect Russia to stop trying. Socialist revolutions come properly, according to Marxism, after a country has been industrialized. History and practicality, though, have made revolutions easiest in countries without pervasive industry.

Industry is the key. It is in the United States and Mexico's best interests to build a stable economy and working class. Instead of helping, though, the United States has either ignored or exploited Mexico. Here's a recent example:

In 1977, America was living through a bitter winter, and Mexico had the newly-found natural gas we needed. Mexico offered to help finance and build the needed pipeline, and posted a price that was, all things considered, very reasonable.

The Carter administration responded by treating Mexico like an unruly child. James Schlesinger, then secretary of energy, tried to beat the price down. The state department made sanctimonious sounds about illegal workers.

It was an insult to the new president, Jose Lopez-Portillo. Mexico quit the negotiations.

When huge potential reserves of oil were discovered in the Gulf of Campeche, Carter started serenading instead of scolding. But it was too late; Pemex—Petroleos Mexicanos, the state

oil company—borrowed the project money from Europe and Japan, and

used the natural gas to fuel plants in the north of Mexico.

America's high-handed behavior was an unintended gift of good fortune to Mexico. More banking and trading partners will mean less financial dependence on America; different industries (with different markets) will provide a steadier economy and, in the long run, many more jobs.

Mexico is moving ahead wisely. It will not take its oil money and just dump it on the nation, as Venezuela has done, waste it on unwanted and unnecessary military hardware, as Iran has done.

**Author Harold Atchison is a senior journalism major and a Mustang Daily staff writer.**

There will be no oil "boom." Lopez-Portillo, in a 1978 address to his nation said Mexico will export oil to pay off foreign debt—now near \$30 billion—at that's about all. What's left will be sold at cut rates to Mexican industries.

Fernando Garza, press secretary for Lopez-Portillo, told a interviewer for *Forbes* magazine that Mexico will push these other industries. Mexican manufacturers—especially those making cars, steel, and capital machinery—are aggressively finding new foreign markets. Soon we will be seeing more things produced, instead of just assembled, in Mexico.

Mexico's plan for slow, steady growth is not a wonder drug. It will, though, staunch the brain drain that hits many underdeveloped countries. And it will build a solid base for the Mexican economy.

The first Mexican revolution was 1910. It, and the 1917 constitution started land reforms, restrained the free market, and turned peones into dignified laborers. The second Mexican revolution—new technology and industries and all the benefits that bring—is just beginning.

America would do well to recognize this, and see Mexico as something besides a source of cheap labor and cheap energy. We need a financial partner, not a financial pawn.

## Muzzle-loading rifles interest sportsmen

Mustang Daily—Greg Corning

student Steve Holdridge takes aim with a big-bore black powder rifle at a target on Cuesta Ridge. The rifle is patterned after old-time weapons.

**GREG CORNING**  
Editorial Assistant  
The rifle was complete. Ready to fire. He observed the ritual procedure for the muzzle-loading

rifle: test-firing with spark-producing percussion caps measuring and pouring the 70 grains of black gun powder; then ramming the lead ball, swathed in a greased cloth patch, down

the barrel.

Ready to aim and shoot at my cardboard target about 25 yards away, I was determined not to flinch in anticipation of the bellowing kick from the

heavy, old-fashioned rifle.

Raising the long weapon to shoulder level, I pulled the hammer back slowly, took aim, and after a few seconds, touched the trigger to make the hammer fall.

Nothing except the small "pop" of the percussion cap.

Damn. Another misfire.

So much for romantic ideas of the good old pioneer days. Those old-time explorers must have lived on a knife's edge all the time, facing foes with single-shot guns that, like mine, could misfire any time.

As for me, fearlessly facing a dangerous cardboard box, I calmly put another percussion cap on the nipple and fired again. This time it kicked like a mule. Flame and smoke leaped from the muzzle as the half-inch lead ball fired at the target.

Another cardboard varmint bit the dust.

Shooting old-style muzzleloading rifles is an increasingly popular pastime, as indicated by the growing variety of guns and accessories produced.

Black powder shooters bang away casually at their own tin can targets, or get involved in organized accuracy competition. Some take the sport to the limit of

frontier authenticity, going after big game animals with a single-shot rifle.

Perhaps this is the ultimate outgrowth of the American fascination for the old West. We have watched John Wayne, Clint Eastwood and other western heroes tame the wilderness with primitive

weapons. Now many Americans are taking on the challenge themselves.

Those who hunt with muzzle-loading guns are perhaps seeking a return to the simple challenges faced in less technological times than our own. Indeed, this may be the main cause of the growth of muzzle-loading.

Several burns in Los Padres National Forest

Over 3,000 acres of the Santa Lucia district of the Los Padres National Forest have been under controlled burns since October,

According to District Keith Guenther, prescribed burns have taken place on national forests approximately 10 miles east of Santa

burning provides benefits to the resource of the forest. It increases the number of animals a given acreage can support while at the same time the volume of the forest is thereby aiding in the suppression of wildfire, said Guenther.

Campground and Pine Flat.

Conditions along the five mile section of trail, which runs beside Miranda Pine Creek, are excellent, says Guenther. Access roads are open at both ends of the trail.

Also open for use is the Hi Mountain Campground, located 14 miles east of

San Luis Obispo near Santa Margarita.

Situated amid oak trees four miles southwest on Forest Road No. 30S05, the campground has 11 sites with tables and stoves. While toilet facilities are available, there is no water at this time.

Use of the campground

facilities are free.

Guenther also says that the county road to the Colson area is now open to traffic. While the Forest Service road from the summit near Colson Station down Rattlesnake Canyon and up La Brea Canyon is also open, it is not recommended for passenger cars at this time.

## County health:

## Rabid skunks in county

BY JENNY COYLE

Daily Staff Writer

Rabid skunks in San Luis Obispo County present a public health hazard, according to a Health Department spokesman.

Although no skunks have been reported on the Cal Poly campus, the spokesman said, 11 have

been found in the outer perimeter of the city of San Luis Obispo.

Director of the Environmental Health Department, Tim Mazzacano said the state of California has ruled this county a "declared rabies area" due to the abundance of rabid skunks. Forty-two rabid skunk cases were confirmed in 1979.

Under such a ruling, Mazzacano said, the county must provide an annual vaccination clinic and maintain quarantine laws to confine biting animals.

# Architects, experts to speak Scholarships ready

The Affirmative Action Speakers Committee of the School of Architecture and Design will present a pair of programs May 12 and 19 which will examine opportunities and ad-

vancement potential in architecture.

The programs, entitled "Small Firm vs Big Firm", is scheduled to begin at 7:30 p.m. both evenings in the Gallery (Room 105) of

the Architecture and Environmental Design Building.

The Monday May 12 program will feature Cary K. Jenkins, Corp. President Cary Jenkins

and Cal Poly graduate Morris Poindexter who will show slides depicting the firm's work. The two will also discuss what a new employee must do to succeed in practice.

On May 19 Walter F. Costa of the San Francisco branch of the internationally famous Skidmore, Wings and Merrill firm will show slides of the company's present projects and discuss his relationship with the firm over the past 30 years.

Both of the programs are free of charge.

The Affirmative Action Speakers Committee is a committee of the Cal Poly School of Architecture and Environmental Design.

Scholarships for students from low-income rural families are now available through the Financial Aid Office. Anyone from a farm or ranch family in California who has been accepted for enrollment at Cal Poly or is already enrolled may apply.

Students in any major application forms available at the Financial Aid Office, Administration 128.

The scholarships provided through the California Rehabilitation Corporation Education Fund.

## Nuclear waste lecture

Dr. Margaret Maxey, a consultant on ethics and nuclear waste disposal, will speak on "Ethics And Energy" at 11:10 a.m. today in the Cal Poly Theater.

The free lecture is being sponsored by the schools of Engineering

and Technology and Communicative Arts and Humanities.

Dr. Maxey is the assistant director of the South Carolina Energy Research Institute and a consultant for the Lawrence Livermore Laboratory.

## Realign

From page 1

There is a possibility that other social sciences, economics, psychology and history may also be affected by this move, said Jones.

"I'd like to bring these departments together to see the strength and visibility of the programs," said Jones.

Student senators have been elected for the division of Social Sciences for next year. The senators will still maintain their seats on the senate but they will be representing whatever school the departments are moved into, said Be Walters, assistant director of the Activities Planning Center.

Club representative being elected for the Division of Social Sciences school council would go to whatever school the department moves into, said Walters.

"After composing the Ninth Symphony, I wouldn't hear of celebrating with any other beer but Grenzquell." - L. V. Beethoven

Grenzquell is a premium beer with a taste Germans particularly prize. In fact, they value Grenzquell so highly that they reserve it for special occasions.

Over 500 years of experience in the art of creating a fine natural beer has given Grenzquell a rich yet mellow flavor. A flavor that tells you with every sip that this day is, indeed, special. And Grenzquell is available in a superb dark Pilsner as well.

So the next time you're looking for a really special beer, try one Germans drink on special occasions. Grenzquell. Beethoven certainly would have approved.

## Muskie urges sanctions

BRUSSELS, Belgium — U.S. Secretary of State Edmund S. Muskie Wednesday urged the United States allies to apply "careful and thoughtful economic sanctions against Iran, recognizing that ingenuity, force, offers the best chance for freeing the Iranian hostages. He urged them to see they pay a price," was his message to the NATO Planning Com-

responsibilities.

Muskie urged foreign and defense ministers from 13 of the 15 NATO allies to increase their defense spending while the United States guards the Persian Gulf against the Soviets.

He advised them to keep their hands off Mideast diplomacy even though U.S. led negotiations on Palestinian autonomy are lagging.

And he tried to dissuade the Europeans from watering down last month's decision to cut off trade with Iran except for food and medicine.

## Newsline

## Leader: US landed in Iran

From The Associated Press  
Iranian President Abolhassan Bani-Sadr claimed Wednesday that 96 armed American agents, led by Iranian sympathizers, landed in Iran recently on a two-week sabotage and assassination mission.

He spoke in a Tehran radio interview a short time after the Iranian prosecutor-general's office reported the arrest and imprisonment of two

American men for their alleged part in last month's failed hostage-rescue effort.

The State Department said it had no information about the two men and no comment on the claims made by Bani-Sadr.

## Carter offers refugees airlift

WASHINGTON (AP) — President Carter on Wednesday offered to remove refugees from Cuba by airlift and sealift if President Fidel Castro agrees to the operation and permits screening of the refugees on Cuban soil.

The proposal, which Carter announced personally, also would allow the U.S. government to

determine the number of Cubans who would be permitted to seek asylum here during the next 12 months.

"In summary," a White House statement said, "the U.S. will welcome Cubans, seeking freedom, in accordance with our laws, and we will pursue every avenue to establish an orderly and regular flow."

## Nuclear plant defies state agency

ITTLE ROCK, Ark. — The attorney general of Arkansas said Wednesday the state Department acted without authority in its attempt to stop a nuclear plant from releasing radioactive gas into the atmosphere.

The issue of whether a state agency could override the Nuclear Regulatory Commission Tuesday when Texas Power & Light Co. defied a state order and venting radioactive gas from its reactor in Waco.

The gas had accumulated in the containment building of Unit 1 of the Arkansas Nuclear Plant after a seal on a coolant pump failed Saturday, releasing 45,000 gallons of radioactive water into the atmosphere. The utility vented the gas 66 seconds later and planned to continue over the next 48 hours.

Robert Young, director of the state Health Department, on Tuesday urged the utility to delay release 48 hours,

saying he wanted an independent analysis of the gas.

AP & L officials delayed the release a few hours and then proceeded with the plan, armed with an approval from the NRC.

The utility contended, apparently correctly, that Young did not have the

authority to issue such an order.

"The question really is where does the final authority lie in regulation of nuclear energy," said AP & L President Jerry L. Maulden. "Our understanding is that it lies with the NRC."

## ASI applications

Applications are now being accepted for executive assistants to ASI President Willie Huff. Forms may be picked up in UU 217A from the ASI secretary. The filing period closes May 24. For more information, call the ASI offices at 546-1291.

## ASI Coffeehouse

Special Events will present coffeehouse tonight in Mustang Lounge at 8. Cost is 50 cents.

## Spring Concert

The Cal Poly Bands will present their spring concert on Saturday at 8:15 p.m. in Chumash Auditorium. Cost is \$3 for adults and \$1.50 for students.

## Alternative Club

Marshall Ochlyski of the OH department will speak at the next meeting of the Alternative Energy Club on the solar-heated, windmill-powered greenhouse at the OH unit. The meeting will be today at 11 a.m. in Science North 213.

# Newscope

## The Fantasticks

Cal Poly's spring musical, *The Fantasticks*, will be presented by the music and speech departments tonight, Friday and Saturday at 8 p.m. in the Cal Poly Theater. Doors open at 7:30. Reserved seating tickets, available from the UU box office, and Osos Records and at the door, are \$3.

## Inter-fraternity

A Spring Visitation Day, sponsored by the Interfraternity Council, will be Friday from 3 to 5 p.m. The day is an opportunity for non-Greeks to become aware of fraternities on campus and to get information about rush next fall. Maps for the houses are available at the Activities Planning Center.

## Hearst Castle

The OH Club plans a landscape tour of Hearst Castle May 17. Price is \$1.50. call 541-5193 for more information.

## Industrial arts

High school students from the Central Coast will bring projects of wood and metal drafting to be judged by Cal Poly students and professionals. The display is open to the public in Crandall Gym from noon to 5 p.m. on May 17.

## Ride-a-thon

The Cal Poly Cutting and Reining Club plans a "Distance for Dystrophy" ride-a-thon for muscular dystrophy research May 17. It's a 25-mile ride in Montana de State park with four checkpoints. The course need not be completed but all pledged money must be collected. Check in between 7 and 10 a.m. the same morning. 546-3224 or 546-2221 for more information. chicken barbeque will follow.

## Steel seminar

The Construction Specifications Institute is sponsoring a free construction steel seminar covering the topics of steel reinforcing, steel welded wire fabric, estimating steel detailing, current methods, fabrication bidding and contracting. Meet in the architecture building gallery on May 20 from 9:15 a.m. to 4 p.m.

## Duo chosen all-league

Catcher Phyllis Hickey and third baseman Lorene Yoshihara, who powered the Mustang softball team to a second-place finish in the Southern California Athletic Association, were chosen to the SCAA all-conference squad.

Hickey was the main offensive threat for Cal Poly, leading Kim Graham's team in nearly all offensive categories. The Milpitas junior batted .314 with

four home runs and 14 RBIs.

Speedy Yoshihara paced the Mustangs in three offensive categories, scoring 22 runs, walking 22 times, and swiping five bases. Yoshihara's 19 walks and high run production offset her low .216 batting average.

No member of the Mustang's pitching staff, which fashioned a phenomenal earned run average, were chosen to the team.

Mustang Daily—Barry Shortz

oly decathlon runner Gary Stathas sails over hurdle, trying to perfect his form in time for California Collegiate Athletic Association

Track Championships. The Mustangs will host the CCAA finals which will begin tomorrow.

## Mustang Corral

Buehning, guard Cal Poly women's basketball team, was to compete on the Select Team in the annual Jones Cup tournament May 26-June 8 in Taiwan.

Uising was named to the player team from 16 who were invited out for the team at the Valley's Olympic Center.

21ning, a 5-11 more from Calgary, ta, paced the Mustangs in almost every game this past season, averaging 17.2 points and 10 rebounds per game. She named the most player in the Southern California Association and coaches Wolfgang Gartner and Terry Mott will conduct a Cal Poly Summer Soccer Camp June 16-20 and August 25-29.

points and snared 11 assists against U.C. Santa Barbara.

The Poly Sports Car Club will sponsor the Deep Choke autocross Sunday, May 18, at the baseball diamond parking lot.

The event begins at 11 a.m., but entrants are urged to attend the pre-race meeting at 10:30. Registration for the Deep Choke autocross will begin at 9 a.m. the day of the race and run until 1 p.m.

All cars must be equipped with seatbelts and mufflers.

Cal Poly's senior soccer team and coaches Wolfgang Gartner and Terry Mott will conduct a Cal Poly Summer Soccer Camp June 16-20 and August 25-29.

The sessions are open to all boys and girls between kindergarten and eighth grade and will stress soccer fundamentals.

Each of the one-week, 15-hour courses will cost \$50.

Applications are available at San Luis elementary and junior high schools as well as local sports stores. Applications must be completed by May 23, 1980.

The men's swim team held its annual sports award banquet, honoring eight of the team's top competitors.

Senior free style specialists Bill Bischoff was chosen the team's most valuable swimmer. Bischoff, who will stay on as assistant coach for Mark Johnson's team next year, earned All-American status twice this year.

## Between the lines

# Sports program needs path

BY TOM JOHNSON

Daily Sports Editor

The Cal Poly athletic department has entered an era of uncertainty. The department comes into the new decade unsure of what importance the administration places on athletics and how much the sports program will be funded.

Consequently, the Cal Poly sports department has become like a rudderless boat, sailing aimlessly through troubled water with no apparent destination. The department has looked to the administration through these difficult times when funds are scarce, but have not felt it has received adequate guidance.

It is no wonder the athletic department has traveled this year without apparent direction because the body which is supposed to supply that direction, the Athletic Advisory Committee, has not met all year.

The Athletic Advisory Committee was established to recommend to President Warren Baker and the ASI the specific direction the sports department should take concerning the funding of individual sports and adding and dropping specific programs.

The Athletic Advisory Committee is scheduled to meet at least once a quarter. But Dean of Students Russell Brown, chairman of the 13-person committee, has yet to call a meeting and has kept the committee in the dark as to when the committee will finally meet. As a result,

many coaches have no idea how much money they will be funded from year-to-year and some do not even know if their sport will be budgeted at all.

Dean Brown said he had not called a committee meeting this year because a task force was appointed this fall to make an in-depth study of the athletic and intramural programs and make a blueprint for the administration to accept or reject. Consequently, Brown said there was no need for the Athletic Advisory Committee to meet.

Admittedly, the task force addressed some very important issues. It called for the women's athletic program to receive proportionally equal funding and presented a detailed study concerning the academic progress of athletes. It recommended the Intercollegiate Athletic Department be officially created as of July 1 to separate physical education from intercollegiate sports.

More importantly, the task force asked for a five-year plan to be formed to chart the future of the Cal Poly sports program.

However, even though the five-year plan hopefully will give intercollegiate sports some much needed guidance, that guidance will not come immediately but sometime in the future.

The sports department needs immediate direction so they can plan for next year. The men's swim team, for instance, is making arrangements for next year without knowing whether they will be receiving funds from the department. This is where the Athletic Advisory Committee can come in.

The Athletic Advisory Committee can meet and quickly draft a set of recommendations the administration would follow. In this way, the coaches can get immediate guidance so they can plan for next year.

The athletic department is groping in the dark, searching for some type of guidance from the administration which they are not receiving. Therefore, I urge Dean Brown to re-examine the Athletic Advisory Committee and call a meeting soon. The athletic department needs direction now and the Athletic Advisory Committee may be the only board which can provide that immediate guidance to set intercollegiate sports at Cal Poly on the proper course.

## Fielder alters image

ST. LOUIS (AP) — Scrappy Ken Reitz of the St. Louis Cardinals, heretofore reknowned only for his glove, has remodeled his image at the bat during the National League baseball season's first month.

Slow afoot and not endowed with imposing physical stature, Reitz undertook a twofold project when he could have been whiling away time.

"I've got these two 50-pound hand weights and a 16-pound bat that I swing," he explained. "Every morning, when I got up I ran 2-3 miles. Personally, I think I'm faster. At least my teammates tell me I am."

While Reitz's speed never may set records, it is and has been sufficient to make him one of baseball's surest-handed third basemen.

## Electronics Majors

Houston Openings

The Terminals and Peripherals Division of Texas Instruments, a leader in electronics technology and innovation for over 50 years, is looking for highly motivated college graduates with backgrounds in the following areas:

- Electrical Engineering
- Mechanical Engineering
- Industrial Engineering
- Computer Engineering
- Systems Engineering
- Finance
- Computer Science
- Electrical Engineering Technology
- Industrial Technology
- Business Administration (MBA)

Positions for qualified individuals encompass a broad range of opportunities including:

- Design—digital, analog, electrical, mechanical, logic, microprocessor/memory device, electromechanical, circuit, and automated test systems.
- Development—software and hardware.
- Engineering—manufacturing, facilities, product, systems, industrial, test systems, and service.
- Systems—engineering and analysis.
- Tooling—methods and test.
- Programming—scientific and business.
- Control—production, reliability, and quality.

The challenge, flexibility, and growth potential of these positions make them outstanding career opportunities.

Texas Instruments will be in Anaheim during the National Computer Conference, May 19-22. If you are interested in joining our Houston team of professionals send your resume or university data sheet to: Recruiting Coordinator/P.O. Box 1444, M.S. 7767/Houston, TX 77001.

To schedule an appointment in Anaheim, please call collect to our Recruiting Coordinator, Cathy Jax at (713) 937-2559 any time before May 16. Between May 16 and 21 call (714) 772-7777, leave your name and telephone number.
